Name/Organisation: Cherry Top Farmstay ~ Boutique Eco Village

Address:

Email:

How can we reduce emissions & build resilience: Establish and extend bicycle/walking tracks on old rail lines. Considering the time it has taken to develop the North East Rail Trail we think it would be beneficial to start now to educate/inform people of the benefits of cycle tourism to the individuals health and the tourism sector in our state.

What future opportunities will have most impact: Cycling from the airport to the east coast without the need for a car will reduce pollution. We urge you to support the development of the rail trail network in Tasmania. It may be too simple a suggestion but it will have the support of many small businesses. If it was presented and marketed in a sensitive way to the massive cycling market it's really a no brainer.

Priorities or opportunities missing from draft Plan: Providing opportunities for travelling without a car on a bicycle should be a priority in the event of fuel prices impacting car travel to the extent that people drastically reduce their car usage. How to get to Tasmania on the ferry and get around the state?

Any other ways we can collaborate: Supporting small business with installing e charge stations. For cars and bikes.

Permission: I give permission for my/my organisation's submission to be published.
