

---

Morning,

It appears that there is not a proper process being formulated or used in this proposal.

Ideas are being mentioned without any GENUINE involvement of interested parties, particularly if a group or Party are against the Location of a proposed wind farm. (not against wind farms, just the location)!

The hurry up process of ticking all the boxes which are of interest to the proponents, ie Public Consultation, massive handouts to landowners for access, towers on properties, community handouts (which have already been questionable, not provided! in the past, yet promised) etc the list goes on.

It may be time for further action on this subject in the form of Public Rally, Taking the issue to the next State Election, or a Referendum etc.

Time to put Tasmanians First not Greedy Proponents, who will come and go quickly, and Keep out Overseas Investment opportunities. Tasmanians do not and will not benefit from these type of Developments in the future long term.

Regards

Phil Potter
