Subject: Emissions Reduction and Resilience Plan - online submission form

Categories:

Name/Organisation: Shaun

Address:

Email: Invest in active and public transport. This should be our number one priority to reduce transport emissions. We can do it quick and it is extremely cheap compared to motorised personal transport infrastructure. A secondary priority should encourage transition to EVs, for those who have a need to drive. Discourage car ownership through higher taxes or car owner permits. Discourage multiple and large personal car ownership.

How can we reduce emissions & build resilience: Investment in active transport infrastructure. Mandate provision for active transport infrastructure where any new primary or residential roads are constructed or resurfaced through policy and regulatory uplift.

What future opportunities will have most impact:

Priorities or opportunities missing from draft Plan: Funding and meaningful improvement.

Any other ways we can collaborate: Enable people to use sustainable transport options with ease and safety and perceived safety.

Permission: I give permission for my/my organisation's submission to be published.
