**Email:**

**How can we reduce emissions & build resilience:** Govt vehicles need to be EVs (with proper training of potential drivers). This educated more people about the differences of EVs and stops them being scared of them. This also creates good 2nd hand EV market for Tasmanians to be able to afford EVs.

**What future opportunities will have most impact:** Ensure there are safe, clean EV fast chargers at all tourist destination areas.

**Priorities or opportunities missing from draft Plan:**

**Any other ways we can collaborate:** I recently spoke to an EV renter at a fast charger in Kings Meadows. He wanted to return the EV because it was too different and not "easy" as the rental staff had assured him. He was not given any information on the use of his hire car, or where to go to get quick info. I think vehicle hire companies must be compelled to create and offer to renters, a basic cheat sheet for using the hired EV.

**Permission:** I give permission for my/my organisation's submission to be published.
