

SUBMISSION TO THE CLIMATE CHANGE (STATE ACTION) ACT 2008

From Estelle Ross

April 19th 2021

Thank you for the opportunity to comment on this plan.

I would like there to be concerted action regarding the following.

- No more logging of native forests.
- Support for hydrogen production plants.
- Incentives for people to replace fossil fuel powered cars with electric vehicles.
- Installation of many more charging plants state-wide.
- Increased funding for research into wave and tide projects.
- There should be no support for the Federal Government's proposal to tax homeowners with solar panels for exporting their power to the grid.
- There should be funding into the research and production of seaweed which when fed to cattle prevents them from emitting methane gas.
- Immediate introduction of a bottle and cans deposit scheme
- Use of single use plastics should be banned.
- Residue from crops after harvesting should not be burnt, instead they should be dug in or mulched to prevent CO2 escaping into the atmosphere.
- There needs to more incentives for people to ride bicycles.
