

# 'Amending Tasmania's climate change legislation' submission

## Form Summary

First name: Darren

Last name: Briggs

Organisation  
name: individual

Email  
address:

Submission: As a doctor i'm aware of the impact climate change is already having on our health. As a parent I must act and ask that government legislates strong and enforceable targets for the state to respond to climate change. Health care is responsible for at least 7% of our carbon footprint. The health system / department must be part of the legislation to not only improve its own footprint but to plan for the challenges we have ahead, challenges that are already with us and which are quickly escalating. The medical evidence is overwhelming. Yet very little mention of health in the amendments to the climate change act. Please amend further. Very keen to discuss further. Regards Darren

Consent to  
publish: Yes, I am happy for my submission to be published
